

**Higher Education @ 2030 : R.I.S.E.**  
**Resilience. Innovation. Sustainability. Enterprise.**

**February 25-27, 2021**

**Masterclass**  
**On**  
**“Enterprise Risk Management”**  
**Pre-conference : February 24, 4:00 pm – 5:15 pm**

Risk is part of all our lives. As a society, we need to take risks to grow and develop. From energy to infrastructure, supply chains to airport security, hospitals to housing, effectively managed risks help societies achieve. In our fast paced world, the risks we have to manage evolve quickly. We need to make sure we manage risks so that we minimise their threats and maximise their potential.

While traditional risk management focused on the insurance and financial aspects alone; today, there is a requirement for understanding, analysing and addressing risks from all areas to make sure organisations, academic institutions and individuals achieve their objectives.

Because risk is inherent in everything we do, the type of roles undertaken by IRM qualified professionals (Level 1 to Level 5) are incredibly diverse. They include roles in retail, pharmaceutical, technology, business continuity, health and safety, corporate governance, engineering, planning and financial services.

Register for this masterclass and learn how Enterprise Risk Management (ERM) can help you in managing risk across an organisation and its extended networks - from classrooms to boardrooms.

**Convenor:**

**Prabha Thomas**
